Flood Evacuation Shelter Lists

The city has designated the following facilities as evacuation shelters in cases of river flooding, inundation disasters, and landslides. Based on rainfall conditions and the risk of flooding, inundation, and landslides in each area, evacuation shelters will generally be opened in the priority order of A → B → C. If the risk of river flooding and inundation increases further, some municipal elementary and junior high schools may also be opened as evacuation shelters. In the event of an evacuation, please check the ward's website for the latest information on shelter openings, or contact the dedicated flood disaster call center at 03-5984-2569 or the Risk Management Department.
